Subject: Review: WVDEP TPs
Importance: High

Hi Cristina,

I was unsure whether each TP is for Diana's awareness, or if either is for discussion – please advise.

Nonresponsive based on revised scope

On the EtO issue – as there's a call today, when I transmit the TPs, I'd like to ask Mark whether we can provide an update tomorrow to the provided talking points. Thoughts?

ETHYLENE OXIDE *(For Awareness)*

- We have completed risk exposure modeling for 2 Union Carbide facilities—South Charleston and Institute.
- Using air dispersion modeling inputs (local meteorology and facility-based information) from WV Division of Air Quality (WVDAQ), the risk for populated areas remain high.
- A call with WVDAQ is scheduled for April 29 to discuss next steps. It most likely will include air monitoring at the communities to confirm modeled results.
